

GUANCHEN LIU

MA Digital Media Arts · 3D Visuals / VR Interaction / Game Design

liugc367@163.com +86 155-4645-9607 UK · Seeking positions in China Portfolio · liuguanchen.pages.dev

PROFILE

MA student in Digital Media Arts and lead developer of the independent game *IPHI* (released on Steam / itch.io). Focused on VR/AR immersive interactive experience design and intelligent interactive art installations. BA in Visual Communication Design from Dalian Polytechnic University (Sino-foreign joint program, taught entirely in English). Proficient in Blender, ZBrush, Unity / Unreal, Rhino and AI-assisted design tools (Midjourney / SD), with full-project experience from concept design and 3D modeling to interactive development and iterative testing. Fluent in English with professional working proficiency.

EDUCATION

Digital Media Arts · MA

2025 — 2026

University of Southampton, UK

- Focused on digital media interaction design, immersive visual creation and AI-assisted art applications; research direction: VR/AR immersive interaction and intelligent art installations

Visual Communication Design · BA

2021 — 2025

Dalian Polytechnic University · Sino-foreign joint program (taught in English)

- Systematic training in visual design, 3D modeling, motion graphics and product innovation design; international design perspective with solid hands-on capability

EXPERIENCE

Design Assistant

2024

MAOGEPING Cosmetics Co., Ltd. · Beijing Branch

- Assisted in the brand visual system upgrade across 12 stores in Beijing, restructuring display hierarchy and product showcase flow; average customer dwell time on key products increased by ~15%, and brand recognition rating improved by 22%

PROJECTS

IPHI · Narrative Digital Game (Urban Workplace Narrative) · Project Lead · 6-Member Team

2025 — 2026 · ~6 months

RPGMaker / Blender / Photoshop / After Effects · Released on Steam / itch.io

- Led a 6-member team through topic selection, narrative architecture and promotion planning, overseeing overall production direction and progress; built the story and symbolism systems, created 3D scene animations, and drew the Themis character artwork and promotional posters
- Through dialogue, investigation and combat mechanics, turns workplace survival pressure into a conflict with the protagonist's subconscious, exploring whether burning out for work is justified

Decompression Island · Independent Creator

2025

VR Immersive Experience + Mobile App · Meditation & Stress-Relief Application

- Independently designed a VR immersive experience and mobile App meditation app targeting anxiety and depression among young people in high-pressure East Asian society, building a purple-blue virtual meditation scene covering mood journaling, AI counseling, guided meditation and social sharing
- After 5-user testing and multiple iterations, continuously refined the scenes and music based on user feedback, effectively helping users relieve stress and restore inner calm

Art Incubator · Lead Designer

2025

Arduino + Infrared Sensors + Real-Time Projection · Interactive Installation Art

- Using the Chinese art college entrance exam as a theme, built an interactive installation with Arduino, infrared sensors and real-time projection that metaphorically highlights the mental health crisis of students under exam-oriented education, provoking reflection on the essence of education

Graduation Project · Independent

2025

Scenario-Based Experience Game Scene Design Research · Blender 3D Modeling

- Independently built six immersive healing game scenes in Blender against the backdrop of high-pressure East Asian society, using geometric imagery and visual metaphors to guide users from anxiety to relaxation; accompanied by posters and the magazine *RELAXING TRAVEL* that systematically present the healing concept
